### Internal Quality Assurance Cell

#### Analysis Report on Students and Teachers Feedback

The primary indicator which reveals the actual quality of education is feedback. The Board of Studies, teachers, and authorities use the feedback results as a reference for curriculum redesign and syllabus revision including the introduction of new courses, specialization, practical and methods of learning activities/support services.

The Internal Quality Assurance Cell of the institution gathers qualitative feedback both from the students of all classes who have studied the contents of the syllabus and from the faculty members who have taught the course of the syllabus at the full of every academic year. The evaluations use a 5-point scale. For the 2021 syllabus revision, the following 5-point scaling questionnaires were used to receive the responses.

### **Observations:**

It has been observed from the teacher's feedback that the revised syllabus of 2021 is worth enough to be part of the curriculum. A very few suggestions have been given by the Teachers and as a follow up action the IQAC has noted down them and assure that they will be taken care of in the next possible revision. Almost all the students irrespective of the departments have ranked the syllabus they have studied on a high note. They reported that the course contents were easy to follow and they easily collected the learning materials. None of the student has given any adverse comments or suggestions. Based on the feedback received from Teachers and Students on the revised syllabus of 2021, the IQAC feels that the students were very much satisfied with the syllabus they studied and on the other hand, no major recommendations were received from the teachers. However, the periodic revision of syllabus will be taken up in the ensuring academic year for future implementation.
